## Archie

Archie is a triple draw game. At showdown, the pot is split between the best five-card high hand and the best California (A-5) low hand. A player must have a pair of sixes or better to qualify for the high hand and an eight or better to qualify for the low hand. If no player qualifies in one direction, the player with the best qualifying in the other direction scoops the pot. Where no player qualifies in either direction, the high hand, even though it is weaker than a pair of sixes, scoops the pot.

## Murder

Each player is dealt four cards face down, followed by a round of betting at the small bet limit. Two columns of three cards each (X) are placed in the center of the table as the flop, followed by a round of betting at the lower limit. A third column of three community cards (Y) are placed face up, followed by a round of betting at the big bet limit. A fourth column of three community cards (Z) are placed face up, followed by a round of betting at the big bet limit. This is followed by a showdown. The final board will look like this:

X X Y Z  
X X Y Z  
X X Y Z

All the X cards are placed on the board on the flop, the Y cards on the turn, and the Z cards on the river.

The best high hand and the best A-5 low hand with an 8 or better qualifier split the pot. As in Omaha, hands are made using exactly two cards from each player's hand and exactly three cards from the board to form each portion of their hand. **When forming a hand (high or low), each player may use only one card from each row on the board!** Separate hand and board cards may be used by each player to create their high and low hands.

## Crazy Pineapple (High)

Crazy Pineapple plays like Hold'em except players begin with three hole cards and discard one after the flop betting.

## Chowaha Rules

The game is played with a button and blinds.

Each player is dealt four cards face down, followed by a round of betting at the small bet limit.

Three flops are dealt one above the other forming a 3x3 square of cards. This is followed by a round of betting at the small bet limit.

Two turn cards are dealt vertically to the right of the flop cards from the dealer's perspective. This is followed by a round of betting at the big bet limit.

One river card is placed to the right of the turn cards. This is followed by a round of betting at the big bet limit. This is followed by a showdown.

At the showdown, the board will look like this:

X X X  
Y  
X X X Z  
Y  
X X X

The cards labelled X are the flop cards, the cards marked Y are the turn cards, and Z is the river card.

The pot is split between the best high hand and the best qualifying eight or better low hand.

Hands consist of exactly two cards from the player's hand plus the cards from one flop, one turn adjacent to that same flop being used, and the river. These may be played in any combination EXCEPT that board cards used CANNOT consist of the top row of the flop plus the bottom turn card or the bottom row of the flop plus the top turn card. That is, the flop, turn, and river must all be contiguous cards.
